

# 2-in-1 EAS/RFID Combo Tag

**ALL-TAG's 2in1 Label combines RFID and Electronic Article Surveillance (EAS) technologies in a single label. The labels are compatible with UHF RFID readers, and 8.2 MHz EAS systems and deactivators. The 2in1 Label provides retailers with a simple and cost-effective solution for tracking merchandise, improving inventory management, and decreasing shrink.**

**We can custom design these labels to be compatible with a retailer's existing readers and other hardware. This offers retailers a lower priced option that can be seamlessly integrated into their current RFID program. These labels will always be custom designed to meet the specific requirements of each individual retailer.**

**Patented Worldwide**
