

Universal Ink Tag

Ink tags are referred to as benefit/denial products, because they deny shoplifters the benefit of the stolen merchandise. If a shoplifter attempts to forcibly disconnect a Universal Ink Tag from its locking device, the ink vials will erupt and ink will spill out onto the garment permanently defacing it. Statistics show that shoplifters are deterred from stealing when the target merchandise can neither be worn nor sold.

The Universal Ink Tag can be connected to merchandise in a variety of ways. In a "stand-alone" mode, the tag is combined with a locking mechanism called a "clutch". For retailers using EAS, the Universal Ink Tag is compatible with any EAS tag - adding a double measure of protection.

Our patented "Breakage Indicator Panel" on the top of the Universal Ink Tag allows the ink to be dispersed in all directions. This panel is also a visual indication to the retailer that the ink tag has been tampered with and/or broken.

- Size: 41 mm (1.6") outer shell
- Ink: Water based, non-flammable, non-dry cleanable, non-washable, non-freezable ink.
- Pin Type: 5/8 inch stainless steel
